Professional & Personal Skills

- **Data Experience:** 10+ years of hands-on experience with data at volume, models and databases including DWH and cloud data exposure. Ability to concentrate on key issues using state-of-the art methodologies for detection and resolution of complex problems. Academic research experience.
- **Business acumen:** Understanding business performance and profitability metrics. Experience to set a clear data vision and define a path towards that vision in terms of development, resource use, infrastructure, process and cost management
- **Technical oriented:** Broad know-how of BI technologies, CI/CD processes and coding best practices. Experience designing, developing and maintaining data assets, reporting solutions and dashboards for internal users and/or external clients. Strong technical knowledge in SQL, Python, Airflow and DBT
- **Process management:** Proved success planning and implementing multiple workflows and analytic projects in a timely and detailed manner, both autonomously as within a broader Data Team. 5+ years in an agile and product environment with a Commitment Reliability above 95%.
- **Stakeholder engagement:** Proven Senior stakeholder management. Emphasis on optimizing day-to-day stakeholders' requirements, handling structures to ensure their involvement and review their interests, needs and expectations. Skilled visualization and data storytelling techniques, being able to share data insights with non-technical audiences.
- **Out-of-the-Box thinking:** Highly flexible and adaptable to change. I usually find challenges very motivational and tend to tackle them with a creative mindset, offering when required new strategies to overcome moving targets and/or unanticipated situations.

Work Experience

Business Intelligence Specialist

Period: April 2022 – April 2026

Location; Sidney (Australia)

THE ICONIC

Company: **THE ICONIC**

Industry: Online Retail

- C-Level OKR Reporting & Dashboarding – Tableau/Looker
- Planned and Unplanned BI Support & Data product delivery for all Teams
- Implementation of the Alerting & Observability architecture
- Data Modelling, Transformation Pipelines and Orchestration Maintenance
- Project involvement within the THE ICONIC's analytics ecosystem from a wide-business level: OWMS, Loyalty / Front Row Program Implementation

- Projects within Tech-Product: Blueshift (Enterprise Reporting / Mesh Architecture, dbt-modelling, Semantic Layers, Tableau and Superset decommission and Looker Cloud Implementation Adoption), GA4 migration
- Commercial Transformation Initiatives: Brand / Cat Segmentations and Reporting, Cube 2.0, Price Optimization Tool, Intake Journey / Draft POs, CLV 2.0.
- Power-user for wide AI adoptions (from assistants such as Onyx AI/Nexus (multi-LLM, internal-knowledge grounded), Google tooling (*Gemini/NotebookLM/Looker Conversational Analytics*) to Agentic & Automation end-to-end frameworks such as n8n, MCP Toolbox / GH Copilot, BQ Agents)

Tech stack: GCP (*BigQuery, Cloud Composer, Cloud Run, Storage*), AWS (*RedShift*), Airflow, dbt, Tableau, Superset, Looker Cloud / Studio, RStudio Server, G-Suite Workspace (*Drive, Sheets, Docs, Colab, NotebookLM*)

Business Intelligence Specialist

Period: Feb 2018 – March 2022

Location: Melbourne (Australia)

Company: **JLL**

Industry: Corporate Real Estate

- Optimization of BI methodologies, performance reporting systems and processes
- Tableau dashboarding, visualization and content curation (Desktop/Server)
- Alteryx workflow and App design, development and maintenance (Designer/Server)
- Data modelling, ETL automation and DWH support (*SQL Server 2016*)
- Reporting Metrics/KPIs creation & validation across business lines (Leasing, Workplace Occupancy, PDS, Finance)
- Clients supported: *Telstra, Australia Post, ANZ, WoAG*

Data Analyst

Period: Dec 2017-Feb 2018

Location: Melbourne (Australia)

Company: **Brüel & Kjaer EMS**

Industry: Engineering and Electronics

- Flight & Noise Data Modelling for Perth and Sydney Airports
- Geospatial Data Transformation (*QGIS, Python*)
- Visualization Design from Operational Reports (*Tableau*)
- Extraction & Analysis of Data from ANOMS (Airport Noise Monitoring and Management System)

Business Intelligence Analyst

Period: May 2016-May 2017

Location: Berlin (Germany)

Company: **Adspreemedia GmbH.**

Industry: Performance Marketing, Game User-acquisition

- Design, Deployment and maintenance of custom automated Dashboards and Visualizations
- Financial Forecasting of several business Revenue streams by different Econometric methods.
- Development of multiple phases of DWH Project Management with several GPC technologies
- Deployment of real-time click fraud detection & prevention tool for mobile/desktop campaigns based on ML Tree-based method
- Improvement and update of Fraud Operations Process flows.
- Monitorization of ongoing web traffic from own portals and Ad network campaigns for quality evaluation, optimization and scrubbing purposes

Education

Ph.M. in Library and Information Science

Ph.D. Program "Information in the Knowledge Society"

University of Barcelona (Spain).

Specialty area: Bibliometrics and science assessment

Acquired knowledge: Information Retrieval, Data Management and Visualization, Bibliometrics, Webometrics and Statistical Analysis, evaluation of web resources, Information Architecture, UX and Web Optimization.

BA in History

University of Santiago de Compostela (Spain).

Specialty area: Contemporary History and American studies

Acquired knowledge: Culture, politics and historical societies. Methods, techniques and trends in historical research. Use of documentary and bibliographic resources

Summer Scholarship

Swiss Institute of Technology ETH (Switzerland)

- Statistical analysis of the library's knowledge portal <<http://www.library.ethz.ch>>
- Development of web site KPI & optimization strategies
- Analysis of use of the search instrument originating from the Primo Report Tool
- Study of the connectivity and impact of the "Knowledge portal" within the landscape of the library network NEBIS with Webometric methods
